- The switching unit with 1 output channel is used to control appliances, lights (easy to integrate it to control garage doors or gates).
- It can be combined with Control or System units iNELS RF Control.
- The BOX design lets you mount it right in an installation box, a ceiling or controlled appliance cover.
- It enables connection of the switched load up to 16 A (4000 W).
- RFSA-11B: single-function design - switch on / off.
- RFSA-61B: multi-function design - button, impulse relay and time function of delayed ON or OFF with time setting of $2 \mathrm{~s}-60 \mathrm{~min}$.
- The switching unit may be controlled by up to 32 channels ( 1 channel represents 1 button on the controller).
- The programming button on the unit is also used for manual control of the output.
- Range up to 200 m (in open space), if the signal is insufficient between the controller and unit, use the signal repeater RFRP-20.
- Communication frequency with bidirectional protocol iNELS RF Control.
